### INTRODUCTION TO BE READ OUT:

The following set of questions is part of an international survey program coordinated by the United Nations.

Their aim is to study what influences the decision to have or not have children. This is necessary because over the last decade the birth rate in Australia has declined to the lowest level ever recorded and if this situation continues, it will have an enormous impact on every aspect of our society and economy.

Your participation is voluntary, but it is very important because you represent many other people. If at any point in this section there are any questions you do not wish to answer for any reason you can ask me to skip them.

(*READ OUT IF OTHERS ARE PRESENT:* This part of the interview contains some very personal questions and it would be better if we could complete it without any one else being present.)
